

WHEEL TORQUE WRENCH SET

This 5-piece preset wheel nut torque wrench set is a companion product to the wheel torque sockets and extensions.

Each of the 5-click type torque wrenches are colour coded for easy identification to suit the given applications.

The set comes in a durable plastic protective case.

Features:

- Ratcheting 1/2" drive
- Accuracy +/- 3%
- Preset to specific torque values: 90Nm, 103Nm, 120Nm, 138Nm, 150Nm
- Colour coded for easy selection
- Automatic reset
- Meets or exceeds international standards
- Operates clockwise only
- Complete set to cover most applications

TORQUE MULTIPLIERS

Torque multipliers are designed to easily tighten and loosen fasteners that have high torque values using a torque wrench. Input torque/force is multiplied by the input ratio, to provide a higher output force.

Torque multipliers must be used with an appropriately set torque wrench to avoid overload damage. To extend the life of the torque multiplier, it is best to operate within 80% of the maximum torque output.

All WB Tools Torque Multipliers feature an anti-kickback device.
